Audit Summary

Project Name	Bitcoin V2
Website	https://bitcoin-v2.net/
Blockchain	Binance Smart Chain
Smart Contract Language	Solidity
Contract Address	0x6816fc7705Ce61F24354c1C91E8C50190E22016e
Audit Method	Static Analysis, Manual Review
Date of Audit	01 February 2023

This audit report has been prepared by Coinsult's experts at the request of the client. In this audit, the results of the static analysis and the manual code review will be presented. The purpose of the audit is to see if the functions work as intended, and to identify potential security issues within the smart contract.

The information in this report should be used to understand the risks associated with the smart contract. This report can be used as a guide for the development team on how the contract could possibly be improved by remediating the issues that were identified.

Audit Scope

Source Code

Coinsult was commissioned by Bitcoin V2 to perform an audit based on the following code:

<https://bscscan.com/token/0x6816fc7705ce61f24354c1c91e8c50190e22016e>

Note that we only audited the code available to us on this URL at the time of the audit. If the URL is not from any block explorer (main net), it may be subject to change. Always check the contract address on this audit report and compare it to the token you are doing research for.

SAFU by Trynos

Tokenomics

Rank	Address	Quantity (Token)	Percentage
1	0xb92f6aa74f3b782e1c5c1399f0f32e035f7a8116	21,000,000	100.0000%

Risk Classification

Coinsult uses certain vulnerability levels, these indicate how bad a certain issue is. The higher the risk, the more strictly it is recommended to correct the error before using the contract.

Vulnerability Level	Description
 Informational	Does not compromise the functionality of the contract in any way
 Low-Risk	Won't cause any problems, but can be adjusted for improvement
 Medium-Risk	Will likely cause problems and it is recommended to adjust
 High-Risk	Will definitely cause problems, this needs to be adjusted

Coinsult has four statuses that are used for each risk level. Below we explain them briefly.

Risk Status	Description
Total	Total amount of issues within this category
Pending	Risks that have yet to be addressed by the team
Acknowledged	The team is aware of the risks but does not resolve them
Resolved	The team has resolved and remedied the risk

Disclaimer

This audit report has been prepared by Coinsult's experts at the request of the client. In this audit, the results of the static analysis and the manual code review will be presented. The purpose of the audit is to see if the functions work as intended, and to identify potential security issues within the smart contract.

The information in this report should be used to understand the risks associated with the smart contract. This report can be used as a guide for the development team on how the contract could possibly be improved by remediating the issues that were identified.

Coinsult is not responsible if a project turns out to be a scam, rug-pull or honeypot. We only provide a detailed analysis for your own research.

Coinsult is not responsible for any financial losses. Nothing in this contract audit is financial advice, please do your own research.

The information provided in this audit is for informational purposes only and should not be considered investment advice. Coinsult does not endorse, recommend, support or suggest to invest in any project.

Coinsult can not be held responsible for when a project turns out to be a rug-pull, honeypot or scam.

Global Overview

Manual Code Review

In this audit report we will highlight the following issues:

Vulnerability Level	Total	Pending	Acknowledged	Resolved
 Informational	0	0	0	0
 Low-Risk	3	2	0	0
 Medium-Risk	0	0	0	0
 High-Risk	0	0	0	0

Centralization Risks

Coinsult checked the following privileges:

Contract Privilege	Description
Owner can mint?	 Owner cannot mint new tokens
Owner can blacklist?	 Owner cannot blacklist addresses
Owner can set fees > 25%?	 Owner cannot set the sell fee to 25% or higher
Owner can exclude from fees?	 Owner can exclude from fees
Owner can pause trading?	 Owner cannot pause the contract
Owner can set Max TX amount?	 Owner cannot set max transaction amount

More owner privileges are listed later in the report.

Maximum Fee Limit Check

Error Code	Description
CEN-01	Centralization: Operator Fee Manipulation

Coinsult tests if the owner of the smart contract can set the transfer, buy or sell fee to 25% or more. It is bad practice to set the fees to 25% or more, because owners can prevent healthy trading or even stop trading when the fees are set too high.

Type of fee	Description
Transfer fee	 Owner cannot set the transfer fee to 25% or higher
Buy fee	 Owner cannot set the buy fee to 25% or higher
Sell fee	 Owner cannot set the sell fee to 25% or higher

Type of fee	Description
Max transfer fee	8%
Max buy fee	8%
Max sell fee	8%

Function

```
function setTaxes(uint16 buyFee, uint16 sellFee, uint16 transferFee) external onlyOwner {
    require(!taxesAreLocked, "Taxes are locked.");
    require(buyFee <= maxBuyTaxes
    && sellFee <= maxSellTaxes
    && transferFee <= maxTransferTaxes,
    "Cannot exceed maximums.");
    _taxRates.buyFee = buyFee;
    _taxRates.sellFee = sellFee;
    _taxRates.transferFee = transferFee;
}
```

Website Review

Coinsult checks the website completely manually and looks for visual, technical and textual errors. We also look at the security, speed and accessibility of the website. In short, a complete check to see if the website meets the current standard of the web development industry.

Recommended to not have images used as text. This is bad for SEO reasons.

Type of check	Description
Mobile friendly?	 The website is mobile friendly
Contains jQuery errors?	 The website does not contain jQuery errors
Is SSL secured?	 The website is SSL secured
Contains spelling errors?	 The website does not contain spelling errors
